SUMMARY

A mechanical engineering graduate transitioned to a front-end developer role, bringing in strong analytical and design skills honed through coursework and past experiences. Primarily focused in web app development opportunities.
Availability: November 2024.

TECH SKILLS

- HTML, CSS, Javascript, C++, C, and G-Code.
- React, Figma, Git, Bootstrap, Material UI, Node.js, and Arduino.

SOFT SKILLS

- Complex problem-solving skillset
- Strong managing and planning skillset
- Detail-oriented
- Fast and keen learner
- Results-driven

LANGUAGES

- Native in Bahasa and English
- Intermediate in Spanish
- Basic in French and Italian

CERTIFICATE

- Certified Associate in Front-End Development, by **TalentLabs** in partnership with Khazanah Yayasan Development Programme 2024.
- **Board of Engineers Malaysia's** Graduate Engineer (GE) registered, Mechanical branch.

PROFILES

- **Github**
- **Portfolio**
- **Email**

EDUCATION

Certified Associate in Front End Development, TalentLabs.
- Google Cloud Associate Accredited. Undergo a 4-month apprenticeship under K-Youth Development Programme (KYDP) to acquire invaluable skills and hands-on training in the tech industry.

Professional Certification as Front End Engineer, Codecademy.
- Online learning certification that provided the tools and project assignments to learn the best practices as a front-end engineer.

Bach. of Eng. (Hons) in Mechanical Engineering, Universiti Malaysia Pahang (UMP), Pahang.
- MUET: Band 4

PROJECTS

Portfolio Site ↗
- Designed and developed a fully responsive website, implementing a contact form for visitors to send messages without authentication, dark/light mode toggle, and downloadable resume feature using HTML, CSS, and JavaScript.

Food Order WebApp ↗
- Designed and developed a pizza site for user to add/remove items to/from their cart and for admin to add/remove items to/from the menu. Utilized Figma for prototyping, Material UI for responsive design, and React with state management for implementation.

News WebApp
- Built a full-stack news application where users can authenticate, search for articles via a search engine, and bookmark them using localStorage. Integrated React, Material UI, and News API for real-time data fetching and UI components.

WORK EXPERIENCE

Software Engineering Trainee at Moovby.
August 2024 — Present
- Collaborated in designing and implementing code for Enterprise landing pages and EDM (Email Direct Marketing) campaigns, ensuring clean, maintainable code for team use.
- Responsible for UI/UX designs for additional campaign and service pages, enhancing user engagement and aligning with project goals.

Project Leader at Bryks Art Sdn. Bhd.
Aug 2022—March 2024
- Assess possible/technical risks and provide solutions to the team accordingly.
- Facilitated the documentation of the building processes.
- Managed 4 projects simultaneously with only 18 team members and completing the projects sequentially in the span of 41 weeks.

Model Designer/Builder at Bryks Solutions Sdn. Bhd.
November 2020—Aug 2022
- Conceptualized and crafted multiple series of innovated designs that serves as blueprint designs for the company.
- Mentored the newcomers and improved their skill sets.
